

## Disclaimer

Any surgery, minor or major, involves the risk of infection, bleeding and/or any other per-operative or post-operative complications and undesired effects, including death. That is also true for Follicular Unit Extraction hair transplant surgery, however small it may be.

To minimize the risk of any such undesired outcome it is strongly recommended that precautionary measures and guidelines provided by International Hair Centre are adhered to strictly.

International Hair Centre does not guarantee any specific growth rate or any specific cosmetic result. All information, including pictures, given on the website, in emails or otherwise serve as a general guideline and it depends on many factors, including but not limited to donor-hair quality, colour contrast, age, smoking habits, post-operative measures, maturity of hair loss and many other factors. It does NOT imply that similar growth or results can be expected in this present case.

The undersigned patient understands the information given above and hereby relieves International Hair Centre, for any responsibility for complications, undesired effects, cosmetic result or other consequences whatsoever, of this procedure.
